

Technical data sheet

Rhodium

Rhodium Nitrate

Formula	$\text{Rh}(\text{NO}_3)_3$
CAS No.	10139-58-9
Grade	RM HC 442
Description	Dark orange-brown to red-brown solution
Metal content	62.01%
Molar Mass (g/Mol)	288.92
Melting Point (°C)	-

Storage Condition

2-8°C

Application

Used as a precursor to synthesize rhodium, Rhodium(III) nitrate hydrate is a crystalline compound widely used in the field of catalysis, electro-plating, and glass industry.
