

Technical Data Sheet

Rhodium Nitrate

CAS No.	10139-58-9
Formula	Rh(NO ₃) ₃
Molar Mass (gm/mol)	288.92
Grade	RM HC 442
Appearance	Dark orange-brown to red-brown solution
Metal Content	62.01%

Storage Condition

-

Application

- used as a precursor to synthesize rhodium, Rhodium(III) nitrate hydrate is a crystalline compound widely used in the field of catalysis, electro-plating, and glass industry
