Technical Data Sheet

Silver Acetate

CAS No.	563-63-3
Formula	Ag(OAc)
Molar Mass (gm/mol)	166.91
Grade	RM HC 563
Appearance	White to off white crystaline powder
Metal Content	64.63%
Melting Point (°C)	150° - 200°C Deco.

Storage Condition

- Store in a tightly, dark closed container at ambient temperature.

Application

- Applied in some anti-smoking drugs, such as sprays or lozenges , Suitable for formulating conductive inks and coating polymer films due to its thermal properties.
